MIDRANGE (GRAY)
CLOSE-IN (GRAY)

R70032-RG
MIDRANGE (RED)
CLOSE-IN (GRAY)

Includes:

Insertion Tool

**Vanes (BLUE) for
midrange nozzles**

Installation Instructions

Step 1 REMOVE OLD NOZZLES.

Step 2 INSTALL IN-CLOSE NOZZLE.

Insert in-close spreader nozzle into either of 2 Eagle housing nozzle ports with slots horizontal and pointing down (4:00 and 8:00). Place housing top down on a flat surface and against a secured block. Use tool to push nozzle into port as far as possible. If slots are not in proper position, use needle nozzle pliers to rotate nozzle.

Step 3 INSTALL MIDRANGE NOZZLE.

Repeat above procedure for insertion of nozzle into nozzle port (either side). This nozzle does not require orientation. After nozzle is in place, insert blue plastic vane into base of mid-range nozzle. Reinsert front nozzle.
